Ahex Technologies

Mobile App Dev for Animal Husbandry Company

PROJECT DETAILS

🏷 **Mobile App Development**

📅 **Oct. 2018 - Ongoing**

💲 **$10,000 to $49,999**

" *"Ahex Technologies Pvt. Ltd. responds well to feedback and welcomes challenges."*

PROJECT SUMMARY

Ahex Technologies Pvt. Ltd. created an Android mobile application to streamline record-keeping for dairy farmers. They designed screens of the admin panel and database and then built the front- and backend.

PROJECT FEEDBACK

The app has yet to launch, but it has garnered praise from test users on its easy-to-use interface and appealing design. Ahex Technologies Pvt. Ltd. delivers high-quality products quickly and at outstanding value. Consistent communication and in-depth expertise are hallmarks of their work.

The Client

Please describe your company and your position there.

I am the CEO of Powergotha Management Services Pvt Ltd. We provide animal husbandry products and services to customers based in India.

The Challenge

For what projects/services did your company hire

We engaged Ahex Technologies Pvt. Ltd. to develop an Android mobile application that allows dairy farmers to more easily maintain daily records.

What were your goals for this project?

The app needed to be intuitive and straightforward to use. Its content also needed to be available in local languages.

CEO, Powergotha Management Services Pvt Ltd

Baramati, India

CLIENT RATING

5.0
Overall Score

Quality: 5.0

Schedule: 4.5

Cost: 4.0

Would Refer: 5.0

The Approach

How did you select this vendor?

Our technical lead searched for firms through Upwork. They gave a short description of the app requirements and invited proposals. We spoke to various vendors and looked into their timelines, portfolios, and experience; Ahex Technologies Pvt. Ltd. stood out from the competition.

Describe the project in detail.

We first held meetings over the phone and through email to decide on the app's architecture and user flow. Ahex Technologies Pvt. Ltd. sent designs of various screens for us to view in parallel. Other team members worked on the admin panel, database design, and the front- and backend development. The team accommodated multiple change requests as well.

What was the team composition?

We work with a project manager, an Android developer, two backend developers, and a designer.

The Outcome

Can you share any outcomes from the project that demonstrate progress or success?

The app has yet to launch on the Google Play store, but test users have given us positive reviews so far. They have especially praised its usability, simplicity, and attractive design.

How effective was the workflow between your team and theirs?

We communicate over the phone, WhatsApp, and email. We also find visits to their team in Hyderabad helpful in understanding their

work. They make themselves available and have worked extra hours at times to meet deadlines.

What did you find most impressive about this company?

Ahex Technologies Pvt. Ltd. responds well to feedback and welcomes challenges. Their expert team delivers high-quality products with rapid turnaround.

Are there any areas for improvement?

On occasion, we would have loved faster delivery. However, we're highly satisfied with their end products so far.
